Customer Release Notes

MEALS PLUS WEB SPRINT 39—SEPTEMBER 9, 2020

This document describes enhancements and corrections for *Meals Plus* **Web** and **ISITE.**

You can retrieve the latest available product documentation from the *Meals Plus* Customer Support website, https://support.mealsplus.com.

Meals Plus

A LINQ SOLUTION

EMS LINQ, Inc.

2528 INDEPENDENCE BLVD., STE. 200 | WILMINGTON, NC 28412

New Features

- o **NEW! Customers will be able to view the results of a successful LunchApplication import by opening the results in a .csv file.**
    - After syncing with **LunchApplication.com**, customers can view the following **Import Results** screen:
    - Customers can click the **View Import Result Report** button to open the report as a csv file.
        - o The **View Import Result Report** button will only appear on the **Import Results** screen for new imports from **LunchApplication**.
    - The report will have two pages:
        - o **Auto Created Applications**
        - o **Needs Review Applications**
    - A report will be generated with every **LunchApplication** sync.

- o **NEW! A new Direct Certification/Exempt Import will now remove any previous unmatched students from the Utilities: Unmatched DC Utility grid once a new import is performed.**
    - The customer will be prompted with the following message when running a new **DC Import**:
    - Clicking **Cancel** will return the customer to the previous screen.
    - Clicking **Ok** will allow the import to continue and delete any **Unmatched Student Records** in the grid.

Other Enhancements
Menus
Manage Ingredients
Ingredients Search

- The ingredient search will now use 'starts with…' logic instead of the previously used 'contains' logic when performing any of the column searches.
    - *Example: Searching for 'ba' would return any ingredient with 'ba' anywhere in the name. Now, the search will only show ingredient names that **start with** 'ba'.*

Before   **Now**

Students
Manage Application
New DC Application

- The **DC/Exempt** utility will now use the **Language Preference** from the student contact info when creating a new **DC Application**.
    - The **Language Preference** for the **Head of Household** and **additional household members** will be pulled from student contact information on **New Applications.**
        - *NOTE: The **Language Preference** will not be pulled when updating an existing application.*

Utilities
Export
Universal Data Export

- The **Serving #** field has been added to the **Student Info** list of available fields.

Corrections
Inventory
Orders/Purchasing
Orders

- The error causing customers to be unable to add items to an existing order and print orders has been corrected.

Meals Plus Web Sprint 39 Customer Release Notes

Menus

Manage Menus

Applied Menus

- The error causing the **Reimbursable Meal** components to become unchecked when viewing an **Applied Menu** has been corrected.
- The error casing **Applied Menus** to enforce user-site access has been corrected.

Students

Manage Applications

Application Hub

- The error causing customers to be unable to save manually entered information has been corrected.

Review Incoming Applications

Resulting Application

- The error causing the income information to appear duplicated in the **Resulting Application** field has been corrected.

Utilities

Import

VendorLink

- The error causing customers to receive the error, 'value cannot be null Parameter name: collection' when attempting to run the manual import has been corrected.

DC Unmatched

Unmatched DC Imported Students

- The error causing multiple, duplicate student numbers to appear on the list unexpectedly has been corrected.

ISITE

Manage Menus

Publish Menus

- The error causing **Menus** to not publish to **ISITE** as expected has been corrected.
