PowerSchool Integration

LINQ Nutrition

Step 1:

Configuration
Enable PowerSchool Nightly Import (?)

☐

BASE URL

CLIENT ID

CLIENT SECRET

Enabling the PowerSchool Nightly import will Perform a nightly sync with PowerSchool.

Base URL is the URL of your PowerSchool Integration. Client ID and Client Secret are generated when MPW installs the PowerSchool plugin.

Step 2:

Field Mapping

Student Number	Local Id	Serving Number	Skip
Student First Name	First Name	Student Last Name	Last Name
Site	School Number	Grade	Grade Level
	Map Sites		Map Grades
Teacher	Skip	Birth Date	Birth Date
	Set Teacher Parameters		
SSN	Skip	Parent Name	Mother
Parent Email	Email	Parent Phone Number	Guardian Number
Address	Mailing	Language	Skip
Allergies	Allergies		Map Languages

Match the PowerSchool field names with the MPW names by selecting a PowerSchool field from the dropdown list. Only four fields are required for PowerSchool: **Student Number**, **Last Name**, **First Name** and **Site.**

You can select Skip from the dropdown list to pass over a field that you do not want matched.

Step 3:

Preview
STUDENT ID

The Single Student Preview allows you to import a single student into MPW to ensure that all fields have been mapped correctly

Enter a Student's ID and click **Preview** to preview what everything will be mapped to. If the fields are mapped correctly, click the import button.

Step 4:

Manual Import

Running manual import will start importing your students by mapping their data according to the mapping configuration you chose

Start Import

The results of the import can be viewed in **Utilities: Import Results.**

Click the **Start Import** button to begin the full PowerSchool Import. A looping animation will begin. After you have run the Manual Import, the Nightly Import can be enabled.
